

How Radio Is Sweeping Nation

Housewives Order Your Bread by Radio!

Housewives in Philadelphia have a chance to order their bread by radio. That is, if they have a radio transmitter and receiver and they deal with the particular firm that has equipped the wagon with a radio receiving set. As any housewife will tell you, possibilities radio presents for the housewives of the future.

Low Speech Received Strong

It is no longer necessary to put an "air" more stress on talk to be broadcast by radio than is used in ordinary conversation. The new speech input amplifier shown above takes care of that. This apparatus amplifies the voice before it reaches the transmitting apparatus. Not only is it easy to send the voice broadcast, but the transmitting operator is enabled to hear the voice directly, so that he may supervise the broadcasting.

Radio Relieves Jail Ennui

The days aren't so long in the District of Columbia jail since a radio receiver has been installed. No, it's not a gift of the government. The equipment was "shipped in" and got it. Superintendent W. L. Park is shown at the right.

Radio Brings Joy to Patient

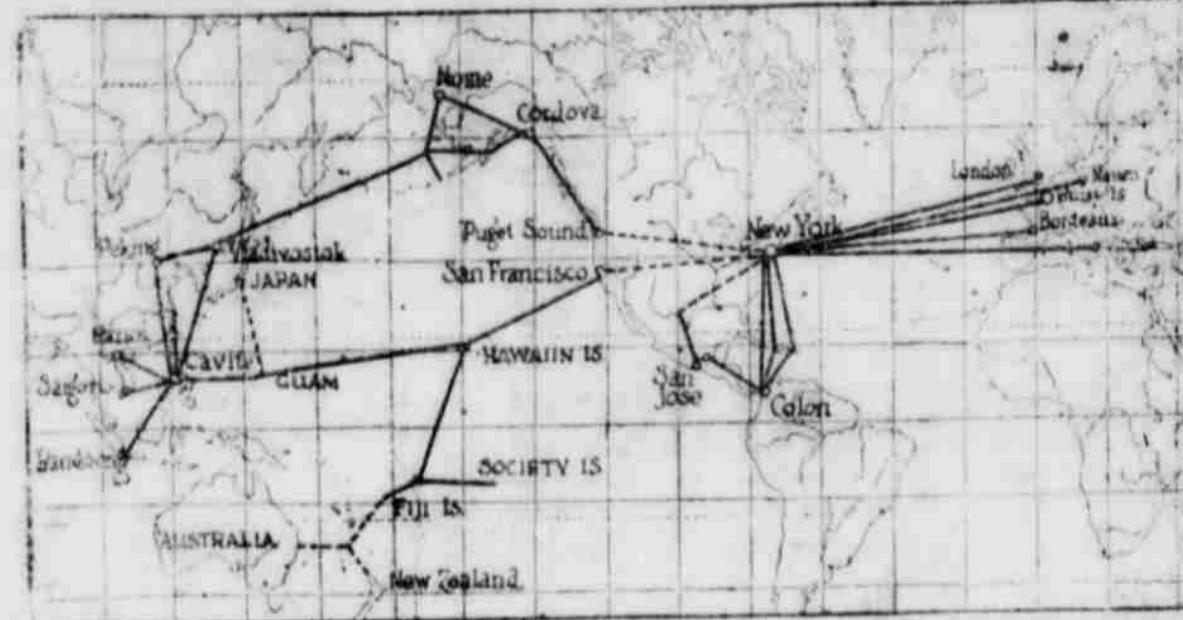

For the last ten years Anthony Modjeski of Grand Rapids, Mich., has been confined to his bed all the while. Modjeski says, he has never found time so valuable as today. Thanks to radio. An electric company gave him the best equipment available, so he can touch with the rest of the world. News, sports, comedy, all kinds of fun come in his hospital bed.

Assures Secrecy

Secrecy of messages by radio is said to be assured by the invention of R. D. Duncan Jr., formerly chief of the radio research laboratory of the U. S. Signal Corps. Duncan calls his invention the "superphone."

Navy Has Greatest Radio Trade

The world's greatest radio business is being conducted in the United States navy. Facts and figures given out by naval officials show an increased volume of messages among the department's radio stations, which they say surpasses the business of any other country or corporation on earth. That does not exclude the worldwide Imperial Radio Chain, which is being contemplated by Great Britain.

The immensity of the naval radio service may be imagined from the fact that the department has more than 225,000,000 messages in this undertaking. More than 2,000,000 words are transmitted monthly. Besides its own official business, the navy does \$10,000,000 worth of commercial radio business annually.

Problems Solved by Radio

English lads are using the radio to help them in their school studies. Broadcasting stations have been sending out valuable information in connection with the various schoolroom lectures, and the boys are taking advantage of this help in solving their more difficult problems. Here are two enthusiasts learning facts about the sun and its life, by radio.

Police Broadcast Reports

New York Police Department has its own broadcasting station. It is considered one of the finest in the country. From its police departments in other cities, with radio receiving equipment, get first information of criminals at large. Superintendent M. R. Brennan of the Police Telegraph Bureau is shown broadcasting such a report.

First to Speak Across Ocean

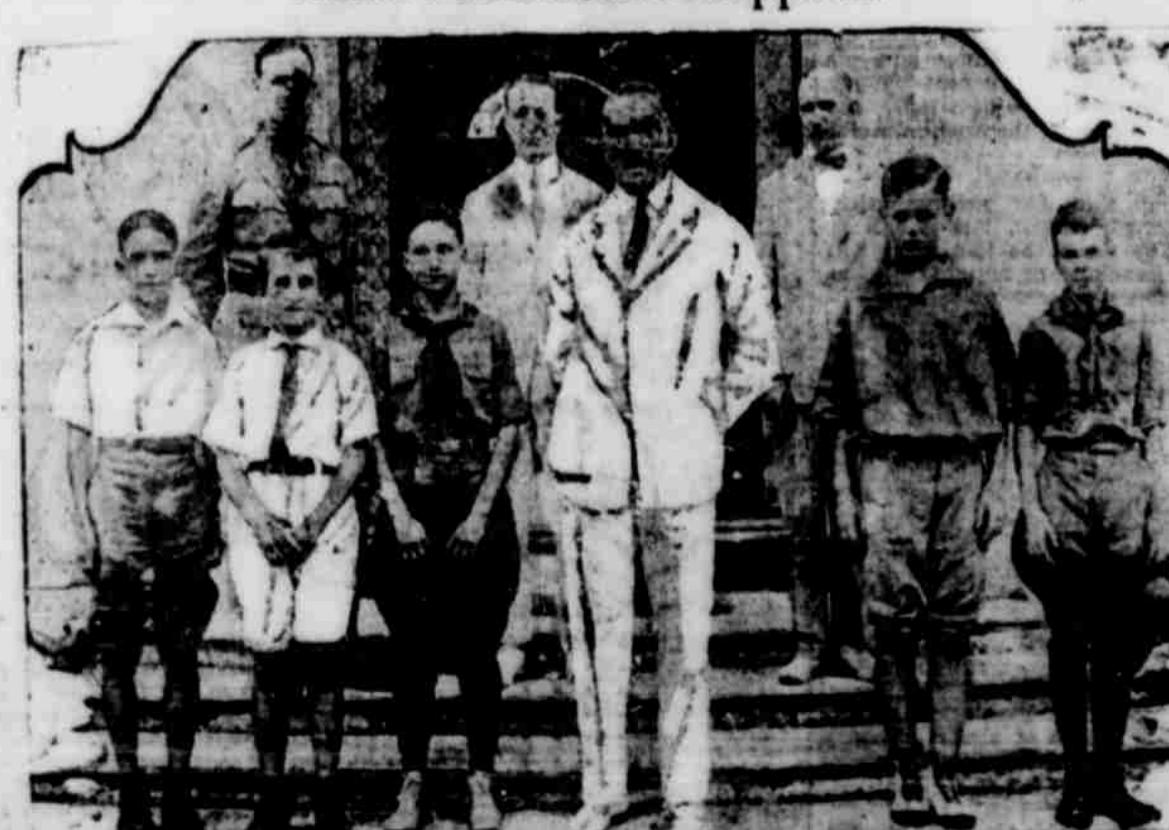

Sir Thomas Lipton, famous Scot sportsman, has the honor of being the first man to send his voice across the Atlantic by radio. From station WOR of the L. Bamberger & Co. store at Newark, N. J., his message was heard at Selfridge's department store in London. All Sir Thomas did to accomplish this historic event was to talk into the small instrument shown. Radio did the rest.

Radio Censor Helps Fans

Radio has its censors. But they're not of the movie variety. They're rather a help than a hindrance to the radio fan. Instead of saying what shall or shall not go by radio, this censor sees that what is broadcast goes out clear and strong enough for easy reception by the radio amateur. He listens in radio concerts and lectures and amplifies the sound and volume for broadcasting.

Radio Pioneers in Philippines

The five boys standing alongside Gov. Gen. Leonard Wood of the Philippines are the pioneers of amateur radio in those islands. They made their own radio sets and are helping others with theirs. General Wood is encouraging the use of radio among the boys of his territory.

Germany Gets World Weather

All reports of the world's weather forecasters come to official Germany by radio. This is part of the receiving equipment of the huge Berlin station which receives reports from London, Paris and other important centers. Later, from the transmitting end of the same station, a summary of these reports are broadcast to radio fans in Germany.
