**WSB—Atlanta (429 Meters).**  
 8 to 9:30 p.m.—Organ recital.  
 11:45 p.m.—Radio concert.

# Radio to Make the North Pole a Neighbor of The Equator

Dr. MacMillan in the Radio Room of the Bowdoin

The Star, in conjunction with other great newspapers of the North American Newspaper Alliance, is sending Dr. Donald B. MacMillan, the companion of Lieut. Peary on his pole-discovering expedition, into the far north upon a most important scientific mission. For the first time in the history of world exploration the Radio forms a feature of the equipment—and with it is hoped to maintain continuous and direct communication with the expedition. Through that long and tedious six-months night of the frozen north Dr. MacMillan will sit in his tiny cabin on his little ship—Bowdoin—and literally chat with the radio fans of Washington snuggling by their warm firesides here in the National Capital.

Think what the prospect means to Dr. MacMillan—to be able to send his messages out of that awful lonesomeness of snow and ice—knowing that they are falling upon eager, listening ears. Messages of hopes realized; ambitions achieved; purposes fulfilled—or maybe a story of mishap or disaster—with at least the heartening knowledge that here and elsewhere throughout the United States, hearts will throb in sympathy at the sorrows, or they will beat in joy over the triumphs wirelessly by Donald Mix, the young radio expert member of Dr. MacMillan's party—receiving in return word from home—and the entertainment provided for radioists here.

## The Star Exclusively in Washington

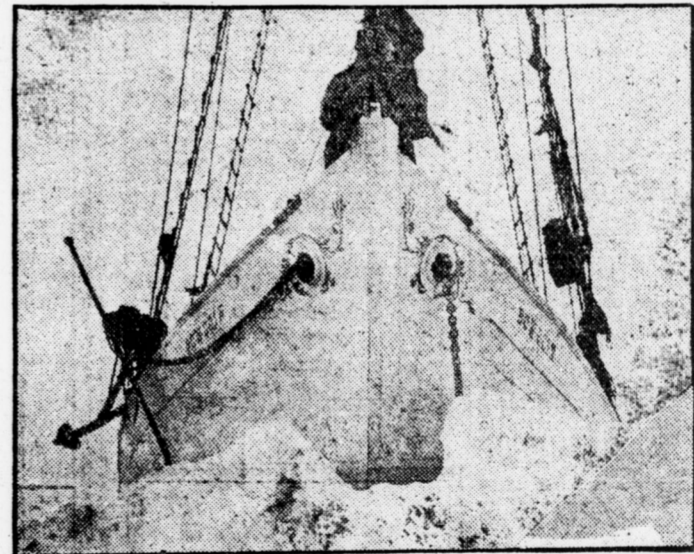

—will give full and accurate reports of the MacMillan expedition—as it goes on its way northward—and while in the land of the midnight sun.

Already the Radio is clicking out the news of the progress of the Bowdoin—and Washington Radioists are invited to listen-in for these messages. The following schedules will be observed. The time noted is Eastern Standard time:

- 10:00 P.M. to Midnight—WNP will QRX for press reports.
- Midnight—WNP will QRX for reports via NSS (17,000 meters).
- 1:00 A.M. to 2:59 A.M. WNP will communicate with amateurs.
- 3:00 A.M. to 4:59 A.M. WNP will work a special schedule.
- 5:00 A.M. to 7:00 A.M.—WNP will communicate with amateurs.
- \*WNP will QRX on about 750 meters for special work with limited commercial stations.

## Will the Wireless Work Under the Peculiar Conditions of the Magnetic North?

That's a question that cannot be answered until Dr. MacMillan reaches the far north—but the best authorities are satisfied of successful radio communication. Whether interested only in the exploration side of Dr. MacMillan's venture—or in the part the radio is to play for the first time—you'll want The Star regularly—for only through The Star in Washington can you read MacMillan's own official reports of this great exploration into a country about which little is known—and up to now told only in recorded data—but which with the wireless will be literally spoken into the ears of civilization by the chief actor in the expedition—through the radio and The Star.

The Bowdoin with its nose fast bound in the ice.

### U.S. WOULD DISCUSS RADIO IN WAR TIME

Favors International Conference to Consider Form of Treaty.

An international conference for the purpose of drafting into treaty form the report of a commission of jurists which met at The Hague December 11 on rules of warfare to govern the use of radio telegraphy and aircraft, is favored by the American government. The other powers represented on the commission—Great Britain, France, Italy, Japan, Holland—are said to have been approached in this connection, but so far as known a decision has not been reached.

**Text of Report Made Public.**  
 The State Department yesterday made public the text of the general report of the jurists' commission, which in its final form comprises twelve articles dealing with radio and sixty dealing with aircraft. The substance of the more important articles proposed already has been published. The plan of the Washington conference which created the commission of jurists contemplates the writing of new articles into international law to deal with agencies of warfare developed since The Hague convention were signed and with which the Washington conference did not itself deal. Until the new proposals have been put in treaty form and been accepted universally by the nations they cannot be regarded as effective or as setting up new definitions of international law. Examination of the proposed rules of warfare for radio and aircraft shows that the commission of jurists did not seek to declare any new principles, but only to apply the recognized principles of existing international law to these new agencies of warfare, seeking to make the application in accordance with the physical properties of each agency.

**SOCIALIST CHIEF SLAIN.**  
 Leader of Spanish Party Assassinated by Unknown Group.

By The Associated Press. GLION, Spain, June 25.—Leon Meña, president of the Socialist Society of Glion, was assassinated last night. The identity of the assassin is unknown.
